CAREER OBJECTIVE

A dedicated computer programming major graduate with knowledge in web development, software development, system development, and database management. Seeking an entry-level position in the IT industry where I can utilize my programming, analytical, and problem-solving skills to support system development, data management, and technical operations while continuously expanding my knowledge in modern technologies.

EDUCATIONAL BACKGROUND

Tertiary:
Technological University of the Philippines – Manila
Bachelor of Technical Vocational Teacher Education
Major in Computer Programming | 2022-2026

Senior High School:
AMA Computer College
Science, Technology, Engineering, and Mathematics (STEM)
Regalado Highway, Novaliches, Quezon City | 2020-2022
Academic Honor: *With High Honors*

CORE COMPETENCIES

- Data Analytics
- Computer System Servicing
- Effective Communication and Public Relations
- Report Writing and Documentation
- ICT and Microsoft Office Proficiency
- Web Development (HTML, CSS, Bootstrap, Javascript, Node, Express, Vue, React, Next, Typescript)
- Python (Machine Learning, Deep Learning, Open CV)
- Database Development (SQL, MongoDB, PostgreSQL, Supabase)

Student Teacher (OJT)
Manuel L. Quezon High School,
February 26, 2026 - March 20, 2026

- Conducted TLE classes in Computer System Servicing for Grades 9 and 10.
- Received high performance ratings and commendations for instructional delivery and professionalism.
- Facilitated hands-on laboratory exercises, guided students in performing computer hardware and software tasks, and ensured adherence to laboratory safety procedures.

- Monitored student performance through quizzes, practical demonstrations, and classroom participation, providing constructive feedback to support learning outcomes.
- Developed engaging lesson plans, instructional materials, classroom activities, and assessments to promote students' technical knowledge and practical skills.
- Applied effective classroom management techniques to maintain an organized, inclusive, and productive learning environment.
- Collaborated with supervising teachers and school personnel in preparing instructional documents, evaluating student progress, and improving teaching strategies.

Web Developer Intern (OJT)
TCL Sun Inc. 4th Floor, Zen Towers, Natividad Almeda-Lopez, Ermita, Manila, 1000 Metro Manila, Philippines.
June 23, 2025 - August 8, 2025

- Delivered quality customer service and maintained a clean, organized work area.
- Created a local website with interactive, functional design and database for eCommerce Department.
- Assisted the eCommerce Department in daily operational activities, providing reliable administrative and technical support to ensure efficient workflow.
- Designed and integrated a database to manage and organize operational data, ensuring accurate storage, retrieval, and maintenance of information.
- Worked closely with department personnel to gather system requirements, implement requested features, and refine the application based on user feedback.
- Applied web development, database management, and problem-solving skills to deliver a functional system that supported the department's day-to-day operations.

TRAININGS, CERTIFICATES & RECOGNITIONS

- **TESDA Certificate:** Computer System Servicing NCII
- **TESDA Certificate:** Data Analytics III
- **TCL Certificate of Completion:** Industrial internship
- **College Diploma:** Technological University of the Philippines
- **Next Certificate of Completion:** Vercel
- **React Certificate of Completion:** Vercel

PROGRAMMING PROJECTS AND LANGUAGES

- **HTML, CSS, Vanilla Javascript, Node, Express, Vue, MongoDb**

  - TCL E-commerce Department Tracking system (OJT) - An overall system that provides users feedback on products, tracking system, content upload schedules, and specific features for every role in TCL E-commerce Department.
  - eModulo (Capstone) - A Web-Based Object-Oriented Programming Learning Module with integrated game features for every activity.
  - Don Bosco Technical Institute Makati Laboratory Inventory System - An inventory system made for the STEM laboratory in Don Bosco Makati.

- **PYTHON (MACHINE LEARNING, DEEP LEARNING, OPENCV)**

- Detecting Fake News
- Multivariate Linear Regression
- Linear Regression
- Document Scanner
- Face Detection

- **React.js , Next.js, TypeScript, PostgreSQL**

  - Open Public Access Catalog - An online cataloging system for libraries.
  - Point of Sale System
  - Finance Tracker
  - Chat App
